RESOLUTION #5

Parking Lots

It is the opinion of the housing committee that the current parking situation will continue to get worse in future semesters; and that the university should seek a more permanent expansion of parking facilities.

We propose that the university add parking spaces by the following measures:

- (1) Expansion of Pearce-Ford lots into the adjacent fields,
- (2) Expansion of Douglas-Keen lot,
- (3) Expansion of College of Education parking lot,
- (4) Addition of further levels to the parking structure.

We recognize that these changes especially additions to the parking structure, would constitute large expense and effort, but in view of the continued growth of the amount of cars on campus, we see these measures as the simplest, most permanent solution to the problem.
