RESOLUTION 94-12-F
Computer Lab Instruction
November 1, 1994

PURPOSE: To make the use of all computer labs easier and more accessible to the users and the workers.

WHEREAS: The computer labs on campus have been or are in the process of hardware changes and software up-grades, and

WHEREAS: Students are not knowledgeable of the new commands for all of these changes, and

WHEREAS: The workers at these labs have to answer the same basic problems hundreds of times for the many students using these labs.

THEREFORE: Be it resolved that we the members of the Student Government Association do hereby recommend that each computer lab post a list of the most frequently asked questions, along with the best answers to these questions, so students can solve the basic problems they encounter for themselves at each of the computer labs.

FURTHERMORE: Each computer lab should have a simple step-by-step set of instructions to allow students to successfully access a computer, execute the basic commands needed to get to the word processor screen for typing a paper, save your work, print and exit the software, and computer system, and post a list of vax commands and what they do.
