

Resolution 78-3
Proposed open house/Visitation Changes
Introduced 9/19/78
Passed/Failed _____

Whereas, the residence halls are the homes of all on-campus students while they attend Western Kentucky University and as such should be considered a place to entertain friends and family instead of just a mandatory sleeping place provided by the University, and,

The residence halls are the only places provided on campus where student can create their own personal home-like environment and experience the unique security that comes from the self pride of projecting their own moods and ideals in the creation of this home-like environment, and,

The other facilities presently on Western's campus (i.e. DUC, dorm lobbies, Garrett Conference Center, etc.) fall short of duplicating this personal and home-like environment and fail to provide students with the privacy and security found in their homes on campus, and,

Open house/visitation is the major opportunity for the student to entertain friends and family and to share this personal environment with their guests, and,

The present form of open house/visitation as a special and random activity (as opposed to a regular and constant weekly program) leads to poor participation and low interest among residents due to the irregularity and random scheduling.

Therefore, be it so resolved that the present open house/visitation schedule be modified to the following schedule

Friday and Saturday 5:00 - 12:00

Sunday 5:00 - 10:00

with the present policy on position of the door remaining at the residents discernment and that ID's will continue to be taken for security reasons. Also, that two resident assistants be required to work each open house/visitation with either the Director or Assistant Director on call and that due to this extra workload all resident assistants be given a free private room. Finally, that these hours be set and not be voted on by the resident population in each hall for if a person does not want to participate, he does not have to.
