

Resolution 78-7

Minority Representation on Presidential Screening Committee
Introduced 10/17/78

Passed/Failed

Whereas minorities comprise 6½% of Western's student body and thus deserve proportional representation on any and all committees involved in decisions pertaining to Western as a whole, and

Whereas the university screening committee has no minority representation when, of all university committees, this one should be a model committee, in so much as it is in the public light, a committee which is in the news of two states, and

Whereas the current composition of the screening committee can not be receptive to the needs of minority students because they cannot know what it is to be a minority student on Western's campus, just as the many men in this world cannot understand the problems associated with being a woman, and

Whereas the presence of a minority on the presidential screening committee would contribute to a better working relationship between the new president and the minority community as a whole.

Therefore; we petition the congress of Associated Student Government to choose a minority representative from Western's student body to act as the second student representative to the Presidential Screening Committee. Because we wish this selection to be done by the Associated Student Government Congress, we feel that the student chosen should not be a past or present member of the Associated Student Government.

AMMENDED AS FOLLOWS:

Therefore, we the Congress of the Associated Student Government support the concept of minority representation on the Presidential Screening committee, and petition our student regent, Steve Thorton, to approach the Board of Regents with whatever proposal he deems appropriate and necessary.
