BOWLING GREEN, KENTUCKY 42101

Office of Associated Student Government

Resolution 81-7
Drainage System
Introduced: 1/26/82

Status: **PASSED**

Whereas, the area directly in front of the Raymond Cravens Graduate Center and Library on State Street, is an area prone to flooding, and

Whereas, this area includes a sidewalk that is used by a large number of students each day, and

Whereas, it is a well-known fact that the surplus water created by rain and other sources has been a major factor of numerous near accidents, and

Whereas, recently a needless accident occurred at this location critically injuring one student and hospitalizing several others, and

Whereas, proper drainage has been a problem in this general vicinity for several years,

Therefore, be it resolved that Associated Student Government and Inter-Hall Council strongly request that plans for proper drainage of this area begin immediately before a life is actually taken.

Furthermore, since a piece cannot be placed on student safety, we recommend that the Board of Regents formally ask the Bowling Green City Council to take the matter into their hands.
