Resolution 98-7-F

Widening of University Blvd. and Installation of a Traffic Island
October 6, 1998

PURPOSE: For the University to engender pedestrian safety on University Blvd. between Big Red Way and Normal Drive by expanding this section of road to include a traffic island.

WHEREAS: This section of University Blvd. is a highly traveled thoroughfare, important to commercial, residential and university traffic, and

WHEREAS: Many students have to cross this section of the road to get to parking lots and athletic practice fields, and

WHEREAS: Since 1991, ten students have been struck by automobiles while crossing this road at the aforementioned area, and

WHEREAS: Widening University Blvd. and placing a traffic island in the middle of the road would provide a safer means for crossing University Blvd. by requiring pedestrians to cross only 2 lanes at a time, and

WHEREAS: The placing of a traffic island would not interfere with the current traffic flow, and

WHEREAS: The placing of a traffic island would make the road safer for motorists.

THEREFORE: Be it resolved that we, the members of Student Government Association, do hereby recommend for the safety of all, that the University widen University Blvd. between Big Red Way and Normal Drive and install a traffic island in the middle of the road.
