RESOLUTION #17

Ice Machines

Whereas, it is oftentimes inconvenient or impossible to appropriate ice in all Western Kentucky University dorms because many students do not incorporate a campus rented or personally owned refrigerator with some form of freezer included, and

Whereas, the campus rented refrigerators only manufacture approximately 1/4lbs. of ice per 12 hours; which is not nearly adequate to the majority of the students' medical and personal needs, and

Whereas, many students have not or could not appropriate some forms of refrigerator to keep perishable items, such as milk and eggs and other miscellaneous items from spoiling

Therefore, be it resolved that Western Kentucky University shall place ice machines in each dorm lobby. Thereby enabling students to appropriate ice to refrigerate perishables items, medical needs and for personal purposes.
