

Resolution 81-13
Electrical Failure
Introduced: 4/13/82

Status:

Whereas, violent storms occur in Bowling Green during the spring and,

Whereas, students often have major tests the day after those storms and,

Whereas, students need light to study by after sunset and,

Whereas, these storms have been known to terminate electrical power on Western's campus, and,

Whereas, some students often delay studying until the night before a major test,

Therefore, be it resolved that students not be required to take major tests after power was terminated for an appreciable time the previous night.
