RESOLUTION #9

15 - minute parking

The parking situation at Western is hard to live with, especially for female students who live in dorms.

Parking spaces are not available for short-term parkers. This means that men who drive to a dorm to pick up their dayes simply have no place to park!

Therefore, it is proposed that two 15-minute parking spaces be provided for every dorm.

This proposal would mean that many people could use the same space. This would cut down on parking congestion.

Often, short-term parkers illegally park in yellow spaces and in non-designated areas simply because there is no other place to park. This is both unlawful and unnecessary.

Therefore, this resolution, if put into effect, would greatly benefit the university and especially benefit the people who live on Western's campus.
