Resolution 90-11-S
PFT Windows

PURPOSE:

To have mechanisms installed on the windows of Pearce-Ford Tower so that the windows can be opened to some degree allowing the entrance of fresh air

STATUS:

WHEREAS,

It has been proven that buildings with permanently closed windows and forced-air circulation systems provide their residents with little fresh air causing damage to the health of the residents, and

WHEREAS,

The windows in Pearce-Ford Tower are currently locked shut and the residents' only source of fresh air is through forced-air ventilation, and

WHEREAS,

Residents and the administration of Western Kentucky University are in agreement that this ventilation system does not work properly, and

WHEREAS,

This lack of fresh air has residents breathing the same dust filled air as it is recirculated because the closed windows force the dust to remain in the building, and

WHEREAS,

In addition to the dust which is recirculated, bacteria, fungi, mold, pollen, and cigarette smoke are continuously blown to residents through vents, and

WHEREAS,

The Environmental Protection Agency has determined that such air can contain 10 times the number of contaminants as air in a properly ventilated building, and

WHEREAS,

Prolonged exposure to such contaminants has been found to cause cancer, asthma, bronchitis, and emphysema**, and

WHEREAS,

Short term exposure to such an environment depletes the immune system leading to colds, nausea, and lack of energy

WESTERN KENTUCKY UNIVERSITY

BOWLING GREEN, KENTUCKY 42101

Office of Associated Student Government

THEREFORE:

Be it resolved that we, the Associated Student Government of Western Kentucky University, do hereby ask the administration of Western Kentucky to install an apparatus on each window of Pearce Ford Tower so that each window can be opened to a degree which they deem sufficient to allow fresh air to enter the building and at the same time allowing airborne particles damaging to one's health to exit the building

FUTHERMORE:

The execution of such measures should take place as soon as possible to limit the duration of the residents exposure to such poor health conditions.
